## Client: Panelbase

## Agency: panelbase

Universe: Adults resident in Scotland
Methodology: Online
Sample size: 1004

Fieldwork dates: 15 September - 17 September 2014

Weighting: All the results were weighted by age, sex, household tenure, country of birth and SEG. Respondents who voted in the 2011 Holyrood election and/ or 2014 European elections were weighted back to the actual election results. Independence voting intention questions were filtered on 8-10 likely to vote.

Further enquiries: ivork@panelbase.com

The headline independence figures for our final referendum poll are as follows:
Yes - 45\%
No - 50\%
Undecided - 5\%
When undecided are excluded, this leaves Yes 48\%, No 52\%.

We asked undecided voters to imagine that they were standing in the polling booth, and slightly more said they would vote No than Yes. Adding them to the original decided totals produces a result of Yes $47 \%$, No $53 \%$.

In addition to the headline independence question, we repeated some supplementary questions from our July Sunday Times poll. In an attempt to depersonalise voting intention, we asked people which side they expected to win the referendum, and also how they expected their friends and family to vote. In both cases we have picked up a shift towards Yes since July.
$35 \%(+7 \%)$ now believe Yes is likely to win, with $40 \%(-15 \%)$ believing it will be No. It seems likely that this result will have been influenced by a general tightening of poll results. In a separate Panelbase poll of almost 2,000 people across the rest of the UK, only $23 \%$ think the vote will be Yes, against $53 \%$ who expect a No victory.
$37 \%(+9 \%)$ say that they expect most of their friends and family to vote Yes against $35 \%(-6 \%)$ who say they are mostly voting No. It's no great surprise that responses to both of these questions are very different between Yes and No voters but some of the changes are still notable. For example only $13 \%$ of No voters now believe they are very likely to win, against $28 \%$ in July.

Both sides are clearly in favour of the Queen remaining as head of state in an independent Scotland.
